## Summary

I am fascinated with turning ideas into reality and by the creative process involved in building user journeys and excellent functionalities. Having a strategic mind helps me to look at problems from distinct perspectives and to draw unconventional approaches to any situation. Along with a passion for the developing process, building clean and efficient innovative projects is always the goal.

## Academic Background

Oct/2022 - Jan/2023	<b>General Assembly (GA)</b> – Remote Software Engineer Immersive - Full Time
Jan/2018 - Aug/2022	<b>Federal University of Paraná (UFPR)</b> – Curitiba, Brazil Bachelor degree in Business Administration
Jan/2018 - Dec/2021	<b>FAE Business School</b> – Curitiba, Brazil Bachelor degree in Economics

## Work Experiences

### General Assembly (GA) Engineering Fellow

Oct/2022 – Jan/2023  
Remote

Worked on solo and group projects encompassing the full-stack process, some of the noteworthy are:

- [Music App](#): browser site for exploring and listening to music. Built with MongoDB as the Database, Node, Express & Mongoose for the backend and EJS files as the frontend. Some of the key features are: working music player, basic search functionality, ability to create playlists and to customize your profile, etc.
- [Online Marketplace](#): a store marketplace where both consumers and stores can interact, advertising products and purchasing them. Built with a PostgreSQL as the database, Python/Django for the backend and React as the frontend. Some of the key features are: user authentication, different interactions for each type of user, search for products, browser and mobile ready, etc.
- [Finance App](#): a finance app that allows you to browse through stocks as well as create your own portfolio of investments. Built with a PostgreSQL as the database, C#/NET for the backend and React as the frontend. Some of the key features are: fully ready for mobile and browser, true user authentication with cookies and hashing, search route, etc.

### ExxonMobil

Jan/2020 – Jan/2022

#### Global Planning Trainee

Curitiba, Paraná, Brazil

- Consolidated the company's strategic decisions by being part of a global team that assess and coordinates the different world regions, regularly interacting and communicating with cross-functional teams around our global offices, in locations such as North America, Europe and Asia;
- Worked closely with the leadership providing reports and insights using Excel, Power BI and Power Point that supported and improved the decision making around strategic subjects of short- and long-term goals;
- Developed dashboards using Power BI and Excel with the purpose of improving data awareness and visualization which in turn increased access level of the leadership to both high level and front-line indicators;
- Managed databases using Microsoft Excel in order to feed the main KPIs of the company from Supply Chain and Team Performances all the way to Commercial and Financial indicators, resulting in a better tracking of the current situation;
- Performed statistical and Data Analysis using Power BI and Excel with the objective of identifying long and short-term trends which in consequence increased operational efficiencies of our strategic team as well as other parts involved.

### International Association AIESEC

Jan/2018 – July/2019

#### Multiple Positions

Curitiba, Paraná, Brazil

- [Main Positions](#): VP & Finance Director and Director of exchanges in Startups.
- [Achievements](#): implemented a new pricing system that helped reduce the volatility of the monthly cash flow while still improving the profits more than 30%. Structured an Agile Scrum team of 8 people from the ground up and featured in the top 3 in exchanges made among more than 50 other offices around the country within one year.
